Art Unit: 3628

## **DETAILED ACTION**

1. Applicant 's arguments filed on 12/05/2002 are moot in view of the new grounds of rejections.

2. Claims 5, 13, 19, was cancelled and claims 1-4, 6-12, 14-18, and 20 has been remained.

## Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patent ability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1-4, 6-12, 14-18, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable Hereinafter Erwin U.S Patent 6,249,770 in view of Hereinafter Ogawa.

As per claims 1, 7-8, Erwin disclose the system enables the user such as business, to make format modifications. (See column 1 lines 55-65 of Erwin). Erwin also disclose the user entering the data on one or more input reports of the system and the system automatically displays a company window showing the input reports and the data that was entered on the displayed input reports, the system then generate one or more calculated reports based on the input data, which then the system automatically displays for the user to view. (See column 3 lines 5-10 of Erwin). Erwin also disclose the historical data for an entity is gathered by the user by retrieving the data from database such as a computer database, storing the data. (See column 2 line 65 of Erwin ). Erwin further disclose a second user interactively inputting a request for a

Art Unit: 3628

second formatted account information from the system. (See column 5 lines 55-65 and column 6 line 5 of Erwin ). Erwin does not explicitly teach formatting first formatted account information into a second formatted account information or transferring a second formatted account information from a storage area to a display device wherein the first formatted account information comprises formatted information for a printed account statement. However Ogawa disclose formatting first formatted account information into a second formatted account information. (see column 23 lines 10-65). Ogawa also disclose transferring a second formatted account information from a storage area to a display device wherein the first formatted account information comprises formatted information for a printed account statement. (See column 2 lines 30-65 and column line 5 and column 8 lines 50-65 and column 9 line 5 and column 26 lines 45-55). It would have been obvious to one of ordinary skill in the art at the time the invention was made that a user can enter data in one format and retrieve the same data in a different format wherein the said formatted information can be displayed and printed. The Examiner summits that the teachings of Erwin modify to include Ogawa can be used to perform the function of formatting first formatted account information into a second formatted account information or transferring a second formatted account information from a storage area to a display device wherein the first formatted account information comprises formatted information for a printed account statement. The benefit would have been to store account information that can be made available for retrieval online by display and periodic, printing or mailing of statements.

As per claims 2, Erwin disclose the Custom Report selection includes features,

Page 3

Application/Control Number: 09/510,984 Page 4

Art Unit: 3628

such as formatting and printing options, and compatible spreadsheet functions. The user formats a custom report by selecting the Custom Report view and using a pop-up menu to switch between different sets of spreadsheet options. The user presses the appropriate button for the user's required function, or alternatively, selects from a wider range of options from the menus. (See column 13 lines 40-45 of Erwin). Erwin does not explicitly teach first formatted account information comprises of an American standard code for information interchange (ASCII) print image file. However Ogawa disclose formatted account information comprises of an American standard code for information interchange (ASCII) print image file.(See column 2 lines 30-65 and column line 5 and column 8 lines 50-65 and column 9 line 5 and column 26 lines 45-55). It would have been obvious to one of ordinary skill in the art at the time the invention was made that these function are common in the art and the teachings of Erwin modify to include Ogawa can be applied to perform these functions. The benefit would have been to have a standard procedure used to print an image file.

As per claims 3, It would have been obvious to one of ordinary skill in the art at the time the invention was made that a storage area can be included in a (SQL) database server. The benefit would have been to store data in the database server.

As per claims 4, Erwin disclose the forecast parameters are likewise entered in the system by the user at the computer in response to an automatic prompt. The system automatically displays a parameters panel, and the user enters the forecast parameters on the forecast parameters panel. (See column 2 lines 50-60 of Erwin ). Erwin also disclose a graphical user interface (GUI) that works in conjunction with the system

, application of the training

Art Unit: 3628

software to prompt the user to input data and to provide the user with spreads and forecasts which enables the user to assess the operating profitability and cash flowgenerating ability of a particular company. (See column 5 line 35 of Erwin). Information is obtained from different sources having different formats upon a request made by a user, the user may be a customer a first business or organization. However Ogawa disclose formatting first formatted account information into a second formatted account information. (see column 23 lines 10-65). Ogawa also disclose transferring a second formatted account information from a storage area to a display device wherein the first formatted account information comprises formatted information for a printed account statement.(See column 2 lines 30-65 and column line 5 and column 8 lines 50-65 and column 9 line 5 and column 26 lines 45-55). It would have been obvious to one of ordinary skill in the art at the time the invention was made that these functions are common and the teachings of Erwin and Ogawa can be modify in order to perform these functions. The benefit would have been to have a user interactively inputting and requesting information using a graphical interface.

As per claims 6, Erwin disclose each of the reports within the system can be formatted by the user in different ways using a button for the Report Format selection from the Company Menu. FIG. 20 is a table which shows examples of Report Format. (See column 10 line 65 of Erwin ). Erwin does not explicitly teach compression algorithm for compressing account information and for indicating formatting information. It would have been obvious to one of ordinary skill in the art at the time the invention was made that these functions are commonly used in the art and the teachings of Erwin

Art Unit: 3628

modify to include Ogawa can be applied in order to perform these functions. The benefit would have been to the formatting of account information to be printed.

As per claims 9, Erwin disclose the system enables the user such as business, to make format modifications. (See column 1 lines 55-65 of Erwin). Erwin also disclose the user entering the data on one or more input reports of the system and the system automatically displays a company window showing the input reports and the data that was entered on the displayed input reports, the system then generate one or more calculated reports based on the input data, which then the system automatically displays for the user to view. (See column 3 lines 5-10 of Erwin). Erwin also disclose the historical data for an entity is gathered by the user by retrieving the data from database such as a computer database, storing the data. (See column 2 line 65 of Erwin ). Erwin further disclose a second user interactively inputting a request for a second formatted account information from the system. (See column 5 lines 55-65 and column 6 line 5 of Erwin ). Erwin does not explicitly teach formatting first formatted account information into a second formatted account information or transferring a second formatted account information from a storage area to a display device wherein the first formatted account information comprises formatted information for a printed account statement. However Ogawa disclose formatting first formatted account information into a second formatted account information. (see column 23 lines 10-65). Ogawa also disclose transferring a second formatted account information from a storage area to a display device wherein the first formatted account information comprises formatted information for a printed account statement. (See column 2 lines

Art Unit: 3628

30-65 and column line 5 and column 8 lines 50-65 and column 9 line 5 and column 26 lines 45-55). It would have been obvious to one of ordinary skill in the art at the time the invention was made that a user can enter data in one format and retrieve the same data in a different format wherein the said formatted information can be displayed and printed. The Examiner summits that the teachings of Erwin modify to include Ogawa can be used to perform the function of formatting first formatted account information into a second formatted account information or transferring a second formatted account information from a storage area to a display device wherein the first formatted account information comprises formatted information for a printed account statement. The benefit would have been to store account information that can be made available for retrieval online by display and periodic, printing or mailing of statements.

As per claims 10, Erwin disclose the Custom Report selection includes features, such as formatting and printing options, and compatible spreadsheet functions. The user formats a custom report by selecting the Custom Report view and using a pop-up menu to switch between different sets of spreadsheet options. The user presses the appropriate button for the user's required function, or alternatively, selects from a wider range of options from the menus. (See column 13 lines 40-45 of Erwin). Erwin does not explicitly teach first formatted account information comprises of an American standard code for information interchange (ASCII) print image file. However disclose formatted account information comprises of an American standard code for information interchange (ASCII) print image file. (See column 2 lines 30-65 and column line 5 and column 8 lines 50-65 and column 9 line 5 and column 26 lines 45-55). It would have

Art Unit: 3628

been obvious to one of ordinary skill in the art at the time the invention was made that these function are common in the art and the teachings of Erwin modify to include Ogawa can be applied to perform these functions. The benefit would have been to have a standard procedure used to print an image file.

Page 8

As per claims 11, It would have been obvious to one of ordinary skill in the art at the time the invention was made that a storage area can be included in a (SQL) database server. The benefit would have been to store data in the database server.

As per claims 12, Erwin disclose the forecast parameters are likewise entered in the system by the user at the computer in response to an automatic prompt. The system automatically displays a parameters panel, and the user enters the forecast parameters on the forecast parameters panel. (See column 2 lines 50-60 of Erwin ). Erwin also disclose a graphical user interface (GUI) that works in conjunction with the system software to prompt the user to input data and to provide the user with spreads and forecasts which enables the user to assess the operating profitability and cash flowgenerating ability of a particular company. (See column 5 line 35 of Erwin). Information is obtained from different sources having different formats upon a request made by a user, the user may be a customer a first business or organization. However Ogawa disclose formatting first formatted account information into a second formatted account information. (see column 23 lines 10-65). Ogawa also disclose transferring a second formatted account information from a storage area to a display device wherein the first formatted account information comprises formatted information for a printed account statement. (See column 2 lines 30-65 and column line 5 and column 8 lines 50-65 and

Art Unit: 3628

column 9 line 5 and column 26 lines 45-55). It would have been obvious to one of ordinary skill in the art at the time the invention was made that these functions are common and the teachings of Erwin and Ogawa can be modify in order to perform these functions. The benefit would have been to have a user interactively inputting and requesting information using a graphical interface.

As per claims 14, Erwin disclose each of the reports within the system can be formatted by the user in different ways using a button for the Report Format selection from the Company Menu. FIG. 20 is a table which shows examples of Report Format. (See column 10 line 65 of Erwin ). Erwin does not explicitly teach compression algorithm for compressing account information and for indicating formatting information. It would have been obvious to one of ordinary skill in the art at the time the invention was made that these functions are commonly used in the art and the teachings of Erwin modify to include Ogawa can be applied in order to perform these functions. The benefit would have been to the formatting of account information to be printed.

As per claims 15, Erwin disclose the system enables the user such as business, to make format modifications. (See column 1 lines 55-65 of Erwin). Erwin also disclose the user entering the data on one or more input reports of the system and the system automatically displays a company window showing the input reports and the data that was entered on the displayed input reports, the system then generate one or more calculated reports based on the input data, which then the system automatically displays for the user to view. (See column 3 lines 5-10 of Erwin). Erwin also disclose the historical data for an entity is gathered by the user by retrieving the data from

Art Unit: 3628

database such as a computer database, storing the data. (See column 2 line 65 of Erwin ). Erwin further disclose a second user interactively inputting a request for a second formatted account information from the system. (See column 5 lines 55-65 and column 6 line 5 of Erwin ). Erwin does not explicitly teach formatting first formatted account information into a second formatted account information or transferring a second formatted account information from a storage area to a display device wherein the first formatted account information comprises formatted information for a printed account statement. However Ogawa disclose formatting first formatted account information into a second formatted account information. (see column 23 lines 10-65). Ogawa also disclose transferring a second formatted account information from a storage area to a display device wherein the first formatted account information comprises formatted information for a printed account statement. (See column 2 lines 30-65 and column line 5 and column 8 lines 50-65 and column 9 line 5 and column 26 lines 45-55). It would have been obvious to one of ordinary skill in the art at the time the invention was made that a user can enter data in one format and retrieve the same data in a different format wherein the said formatted information can be displayed and printed. The Examiner summits that the teachings of Erwin modify to include Ogawa can be used to perform the function of formatting first formatted account information into a second formatted account information or transferring a second formatted account information from a storage area to a display device wherein the first formatted account information comprises formatted information for a printed account statement. The benefit would have been to store account information that can be made available for

Page 10

Art Unit: 3628

retrieval online by display and periodic, printing or mailing of statements.

As per claims 16, Erwin disclose the Custom Report selection includes features, such as formatting and printing options, and compatible spreadsheet functions. The user formats a custom report by selecting the Custom Report view and using a pop-up menu to switch between different sets of spreadsheet options. The user presses the appropriate button for the user's required function, or alternatively, selects from a wider range of options from the menus. (See column 13 lines 40-45 of Erwin). Erwin does not explicitly teach first formatted account information comprises of an American standard code for information interchange (ASCII) print image file. However Ogawa disclose formatted account information comprises of an American standard code for information interchange (ASCII) print image file. (See column 2 lines 30-65 and column line 5 and column 8 lines 50-65 and column 9 line 5 and column 26 lines 45-55). It would have been obvious to one of ordinary skill in the art at the time the invention was made that these function are common in the art and the teachings of Erwin modify to include Ogawa can be applied to perform these functions. The benefit would have been to have a standard procedure used to print an image file.

As per claims 17, It would have been obvious to one of ordinary skill in the art at the time the invention was made that a storage area can be included in a (SQL) database server. The benefit would have been to store data in the database server.

As per claims 18, Erwin disclose the forecast parameters are likewise entered in the system by the user at the computer in response to an automatic prompt. The system automatically displays a parameters panel, and the user enters the forecast

Art Unit: 3628

parameters on the forecast parameters panel. (See column 2 lines 50-60 of Erwin ). Erwin also disclose a graphical user interface (GUI) that works in conjunction with the system software to prompt the user to input data and to provide the user with spreads and forecasts which enables the user to assess the operating profitability and cash flowgenerating ability of a particular company. (See column 5 line 35 of Erwin). Information is obtained from different sources having different formats upon a request made by a user, the user may be a customer a first business or organization. However Ogawa disclose formatting first formatted account information into a second formatted account information. (see column 23 lines 10-65). Ogawa also disclose transferring a second formatted account information from a storage area to a display device wherein the first formatted account information comprises formatted information for a printed account statement. (See column 2 lines 30-65 and column line 5 and column 8 lines 50-65 and column 9 line 5 and column 26 lines 45-55). It would have been obvious to one of ordinary skill in the art at the time the invention was made that these functions are common and the teachings of Erwin and Ogawa can be modify in order to perform these functions. The benefit would have been to have a user interactively inputting and requesting information using a graphical interface.

As per claims, 20, Erwin disclose each of the reports within the system can be formatted by the user in different ways using a button for the Report Format selection from the Company Menu. FIG. 20 is a table which shows examples of Report Format. (See column 10 line 65 of Erwin ). Erwin does not explicitly teach compression algorithm for compressing account information and for indicating formatting information.

Page 12

Art Unit: 3628

It would have been obvious to one of ordinary skill in the art at the time the invention was made that these functions are commonly used in the art and the teachings of Erwin modify to include Ogawa can be applied in order to perform these functions. The benefit would have been to the formatting of account information to be printed.

## Conclusion

 The prior art of record and not relied upon is considered pertinent to Applicants disclosure.

Stroller (US 5,740,427 Patent ) teaches modular automated account maintenance system.

Sprague (US Patent 5,247,575) teaches information distribution system.

Brown (US Patent 5,794,219) teaches method of conducting an online auction with bid pooling.

Barnett (US Patent 6,321,208) teaches method and system for electronic distribution of product redemption coupons.

Onishi (US Patent 5,878,201) teaches disk system and factory automated controller and method therefore.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Clement B Graham whose telephone number is 703-305-1874. The examiner can normally be reached on 7am to 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hyung S. Sough can be reached on 703-308-0505. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-0040 for regular communications and 703-305-0040 for After Final communications.
